Subject: Upper Animas UAA

I found a file on my computer that appears to be the complete Use Attainability Analysis for the Upper Animas. It is too big to email, so I have made CDs and will mail them out to the people on this list (for a few of you I will need to find your physical mailing address). If it would be helpful to have more copies sent to other people, Let me know and I will make them. Between the UAA, the ARSG database, and USGS documents, there is a wealth of info on all branches of the upper Animas. It is hard to wrap your head around it when you don't deal with it every day, so I would urge you to ask Peter Butler or Bill Simon to help you find where the answers to your questions may already exist.
